Batteries, small household (A):										
Used Oil - inc container (ct in quarts)										
Pesticides, herbicides, etc. -inc. container										
Cleaners - inc. container										
Auto care products - inc. container										
Other:										
Other:										

Note: Some items have parentheses () after them. The description in parentheses is the equivalent count to be used if you are using the count method. For example, in "textiles", the equivalent number of 4 ft by 6 ft rugs for the amount of carpeting discarded would be counted. Counting is only used when weighing is more time-consuming or impractical.
