Backhaul

A Walkthrough

Core Steps

- Planning
- Operations
- Post-Backhaul Actions

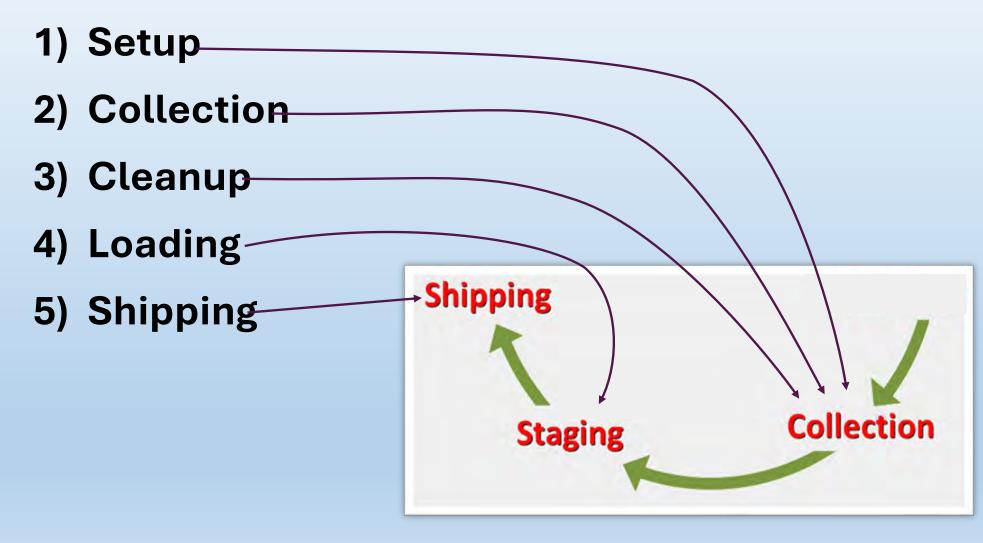

- 1) What will be collected?
- 2) How much to expect?
- 3) Where is it going?
- 4) How will it be collected?
- 5) What do you need?
- 6) How are you going to publicize?
- 7) How much is it going to cost?

1) What will be collected? **Inventory** 2) How much to expect? **Vendor Selection** 3) Where is it going? 4) How will it be collected? **Plan & Budget** 5) What do you need? 6) How are you going to publicize the collection?

7) How much is it going to cost?

Operations

Review

- What worked, what didn't, how will next time will be different?
- Maintain Records and Reports
- Develop/Incorporate into Plans or Manuals for future planning

Backhaul Planning and Guidance

Introduction

When looking at the process of backhauling material it may be helpful to observe it as a cycle. Each successive cycle builds into the next. The more cycles that are completed, the more mature the program grows and the more knowledgeable those involved become. Below is an example of common steps involved in executing a hypothetical backhaul project.

Backhaul Cycle

The steps to the cycle are not set in stone; depending on a project or other circumstances, some steps may be omitted, added, occur concurrently or occur in an alternative order. The cycle above no more than a general overview of common aspects to address when backhauling materials.

Inventory

An inventory is the single most important information when planning a backhaul of any materials. Developing an inventory is as simple as answering the following question...

- What needs to be backhauled? and
- How much is there?

Contacting vendors the type and amount of material you have will likely be the first pieces of information they will inquire about. Having an inventory ready should allow potential vendors to provide more accurate quotes and better assistance. Further, a good inventory will allow planners to...

- Prioritize which items will be backhauled,
- Determine the best method of managing materials,
- . Determine how much space, labor, packaging materials, and other supplies will be needed,
- Budget the backhaul project, and
- Determine the approximate amount of time a project will take.

In short, the inventory is the framework in which an entire backhaul project can be built around.

NOTE: The information, guidance, and instructions benin are mode in good faith and are believed to be consistent in the date of preparation. The such are of this document make to guaranties of the information's partner and future occurrence, either expensed or invalide. It is incurrence if individuals collecting, pacaging, and absolute materials to be severed and committee with all course insultances in extensive relievant residents.

The Problem

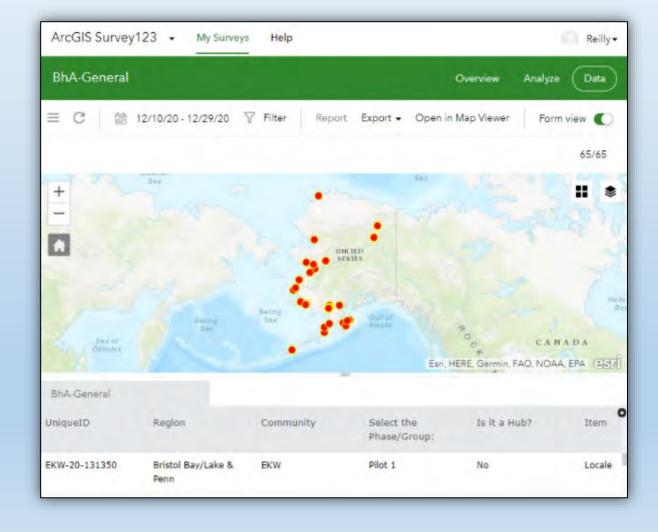

Survey123 – Inventory

1) The App – for completing surveys & submitting records (phone, tablet, computer)

2) The Dashboard – for viewing and analyzing all submitted records collectively (computer only)

- 1) What will be collected?
- 2) How much to expect?
- 3) Where is it going?
- 4) How will it be collected?
- 5) What do you need?
- 6) How are you going to publicize?
- 7) How much is it going to cost?

- 1) What will be collected? Paint (HM & Latex)
- 2) How much to expect? 20ft Container (16 Pallets)
- 3) Where is it going? Seattle... Need a Vendor
- 4) How will it be collected? All ready onsite (landfill)
- 5) What do you need? Packaging Supplies, Labor, Forklift
- 6) How are you going to publicize? NO PUBLICITY!!!
- 7) How much is it going to cost? Need Quotes

How are we going to manage it?

- Regulatory (Non-Haz vs. HW vs. HHW)
- Practically
 - Consolidate
 - Bulk packaging
 - Segregation

How are we going to manage it?

- Regulatory (Non-Haz vs. HW vs (HHW))
- Practically
 - Consolidate
 - Bulk packaging
 - Segregation

- Oil Based/Combustible
- Latex/Water Based
- Other (sealants, adhesives, etc.)

Planning - Supplies

What Supplies Do We Need?

- UN Specific Packaging (Gaylords)
- Pallets
- Liners
- Markings & Labels
- Tape/Tape Gun
- Forklift

Planning - Supplies

What Supplies Do We Need?

Backhaul Planning and Guidance

Introduction

When looking at the process of backhauling material it may be helpful to observe it as a cycle. Each successive cycle builds into the next. The more cycles that are completed, the more mature the program grows and the more knowledgeable those involved become. Below is an example of common steps involved in executing a hypothetical backhaul project.

Backhaul Cycle

The steps to the cycle are not set in stone; depending on a project or other circumstances, some steps may be omitted, added, occur concurrently or occur in an alternative order. The cycle above no more than a general overview of common aspects to address when backhauling materials.

Inventory

An inventory is the single most important information when planning a backhaul of any materials. Developing an inventory is as simple as answering the following question...

- What needs to be backhauled? and
- How much is there?

Contacting vendors the type and amount of material you have will likely be the first pieces of information they will inquire about. Having an inventory ready should allow potential vendors to provide more accurate quotes and better assistance. Further, a good inventory will allow planners to...

- Prioritize which items will be backhauled,
- Determine the best method of managing materials,
- . Determine how much space, labor, packaging materials, and other supplies will be needed,
- Budget the backhaul project, and
- Determine the approximate amount of time a project will take.

In short, the inventory is the framework in which an entire backhaul project can be built around.

NOTE: The information, guidance, and instructions benin are mode in good faith and are believed to be consistent in the date of preparation. The such are of this document make to guaranties of the information's partner and future occurrence, either expensed or invalide. It is incurrence if individuals collecting, pacaging, and absolute materials to be severed and committee with all course insultances in extensive relievant residents.
